## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Joao et al.

(6,529,725).

Joao et al. disclose all claimed limitations recited in claims 1-3, 6 and 8, 9-11, 14, 16-22.

Joao et al. disclose particularly a method and system and a programmed computerized system for processing a transaction in association with a payment authorization service comprising:

Receiving an authorization request over a specified communications device regarding a user's account containing transaction information from a payee;

Sending an approval request to a user using a two way message transmission service;

Receiving an approval response from the user; and

Sending an authorization response to the payee.

Applicant is referred to column 4, line 49 to column 10, line 67.

As per claims 4, 12 and 23, Joao et al teach examining an account profile and determining if the transaction requires authorization prior to sending the approval request. Applicant is directed to column 7, line 48 to column 8, line 36.

As per claims 5, 7, 13, 15 and 25, Joao et al teach the approval request is formatted according to an approval protocol or process. Applicant is directed to column 16, lines 51-56 and column 18, lines 29-54 of Joao et al.

As per claim 24, Joao et al disclose the programmed computer is connected to the Internet for providing the user access to the account profile. Applicant is directed to column 10, lines 3-15 and column 29, lines 38-42.

***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 and 18 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use or advance the technological arts fail to promote the “progress of science and the useful arts” (i.e., the physical sciences as opposed to social sciences, for example) are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts. In the present case, claims 1-8 and 18 do not recite any structure or functionality to suggest that a computer performs the recited claims. Thus, claims 1-8 and 18 are rejected as being directed to non-statutory subject matter.
